- Types of crops- the life of crop

Grade (8th to 11th)

Taught by Preety

Total- 10

Topics- Computer, Mathematics, English

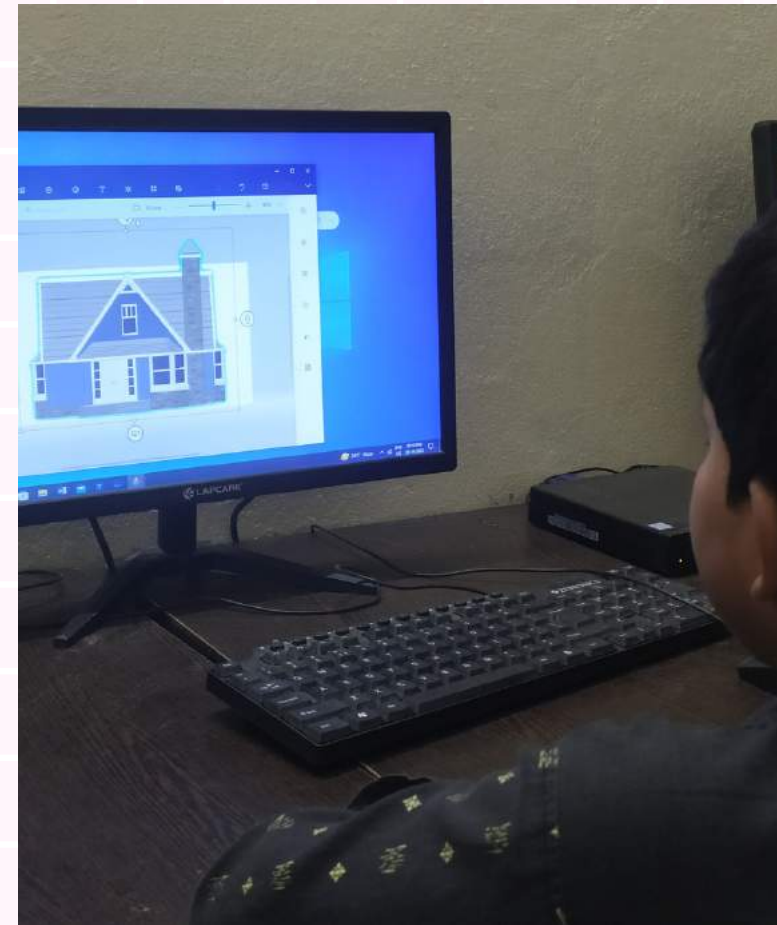

Technology

Kids love computer class the most. They are enjoying learning the beauty of tech.

We are using projector for classroom studies to teach them by animation. i.e, life of butterfly

Students are using youtube to learn new things, like sketching, painting and building things.

Creativity

Children benefit greatly from engaging in creative activities such as painting, origami, and paper. These artistic endeavours not only nurture their imagination but also enhance fine motor skills and cognitive development.

PAINTING– kids explore the vibrant world of colors, expressing their emotions on canvas.

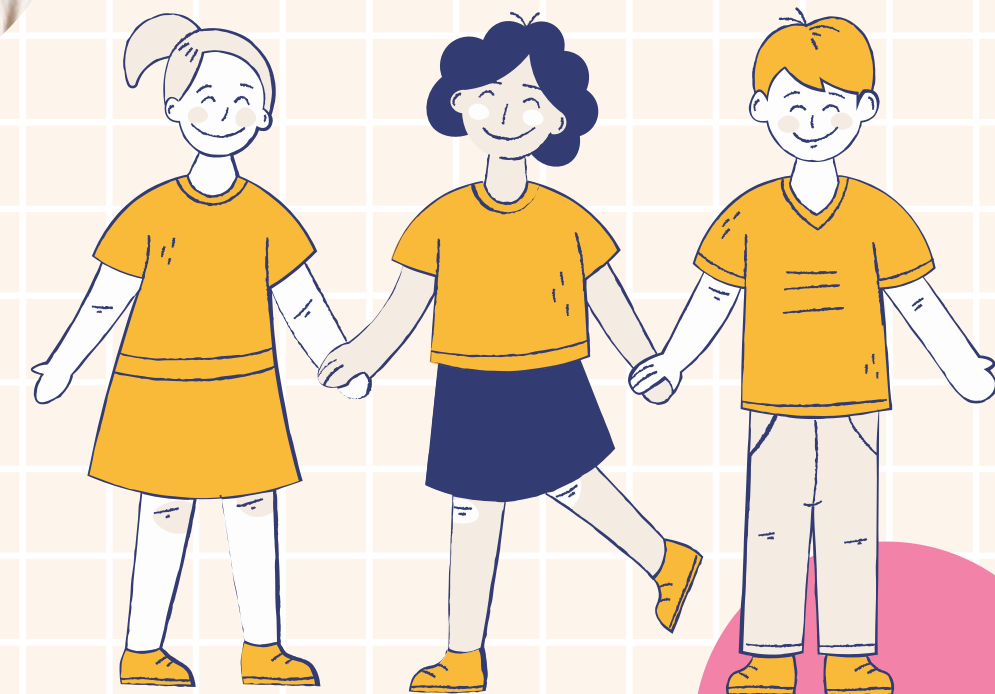

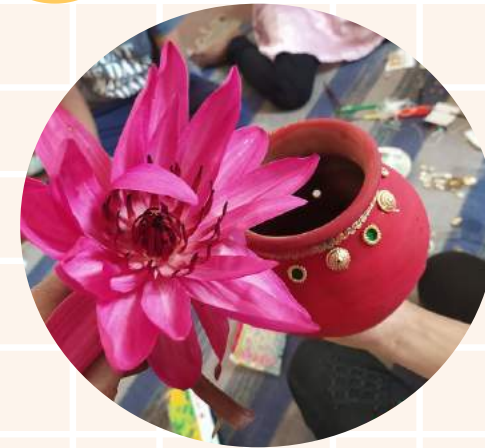

Every kid deserves to have fun and experience joy in their life.

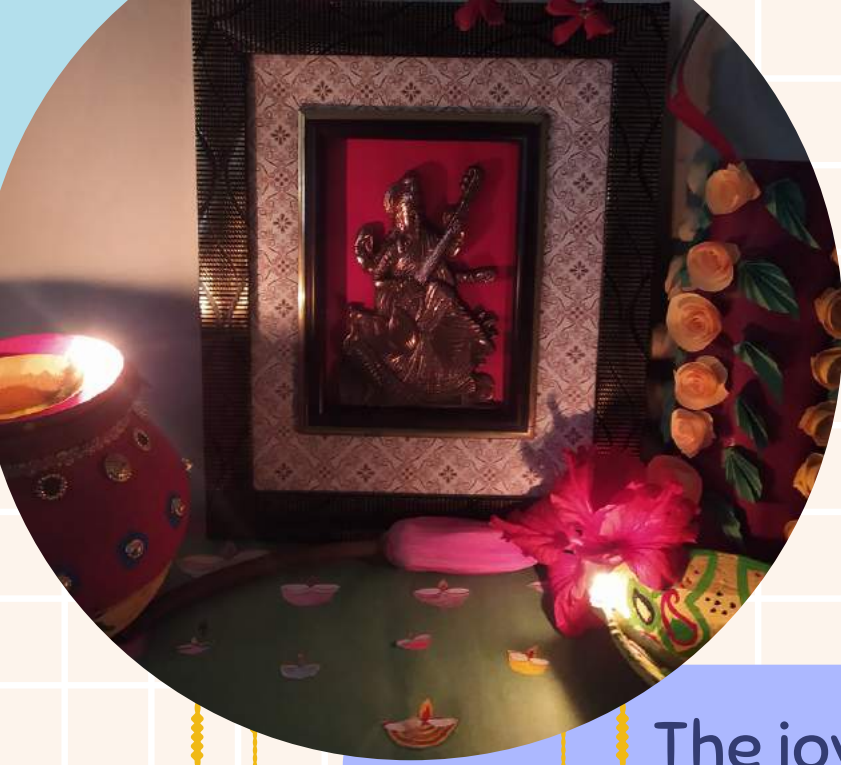

ORIGAMI – it introduces them to the intricate art of paper folding, promoting patience and precision. These hands-on experiences provide a platform for self-expression and foster a love for art and creativity that can last a lifetime.

We Learn, We Have Fun

Centre Decoration by kids

The joyous celebration of Diwali by kids was marked by an abundance of enthusiasm and creativity. The children participated in “Saraswati Puja”, a reverence for knowledge and wisdom. Their heartfelt prayers, accompanied by the melodious rendition of Saraswati Vandana, reflected a deep respect for learning and the pursuit of knowledge.

The celebration reached a spiritual crescendo as the children performed Damodarshatakam, paying tribute to Shree Krishna’s Damodar roop.

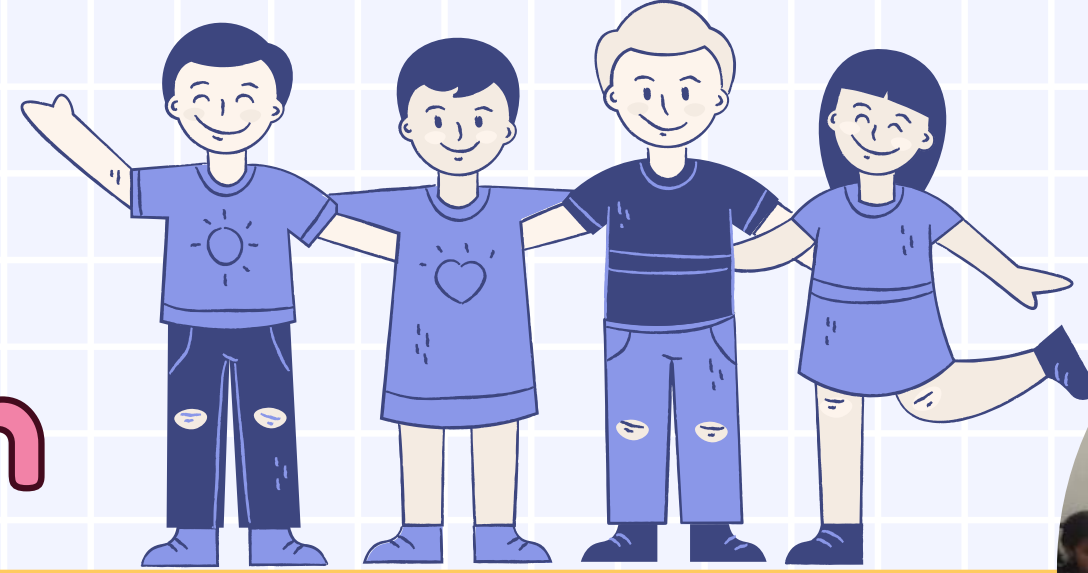

Engaged in various artistic activities--

- they painted traditional diyas,
- crafted intricate paper diya decorations,
- and skillfully assembled hanging diyas to adorn their surroundings.

They enjoyed the day more by having tasty samosas and sweets.

Sircle Session

The enjoyment of the kids suggests that the Sircle team's approach resonates well with the students, creating a conducive and interactive atmosphere for learning and participation.

Integrating magic tricks based on mathematics technology into the learning experience adds an extra of excitement and intrigue for the kids. Kids have been taught some very cool and amazing tricks to the kids, which they love a lot.

The team also appreciated their art and craft work and was very impressed by seeing very brilliant kids out there who were able to answer their tricky questions.

They encouraged the kids to keep working hard.
